Presented by Surgeon B. Morris,
U.S.A.

Case of Miss Sophia Radford. 9286
daughter of Admiral Radford, U.S.N.
injured by being thrown from a horse.

Recovered.

Recd. Oct. 6, 1884.

Skull, showing shot perforation.

Presented by ^{M.E.} Dr. Waters,
Surgeon U.S.A.

See 9288 - Bullet.

9287

Case of Pvt Michael Moran, D,
12th U.S. Inf. wounded Sept 8, 1884.
Died Sept. 10, 1884.

Recd. Sept 19, 1884

Bullet, much flattened.

Presented by ^{M.E.} Dr. Waters,
Surgeon U.S.A.

From same case as 9287

9288

Recd. Sept. 19, 1884.

Upper portions of right tibia
and fibula, showing compound
comminuted fracture.

IV A.A. d.
45.

9289

Presented by Surgeon V.B. Hubbard,
U.S.A.

Case of B.B. Hayes, a civilian,
wounded Aug. 11, 1884, by a Colt's pistol Cal.
Cal. 44. Amputated at lower third.
by the donor, Aug. 24, 1884.
Recovered.

Recd Oct. 17, 1884.

Heart, showing rupture at central portion of posterior surface of left ventricle.

9290

Case of John Mayer, an inmate of Soldiers Home, Washington, D.C.

Died October 5, 1884.

Presented by Asst. Surgeon Calvin De Witt, U.S.A.

Recd. Oct. 17, 1884.

Spleen, showing hypertrophy and rupture.

9291

Presented by ^{Dr. B} Dr. Patterson.

Recd. Sept. 24, 1884.

Heart and ascending aorta, showing pericarditis, & sacular aneurism size of a large orange.

9292

Presented by J. M. Toney, M.D.

Case of L. Fontaine, a millwright. Died of pericarditis.

Recd. October 22, 1884.

Ilio-femoral vessels - Aneurismal varix.

External iliac artery

ligated.

Case of G. C. P., a sailor.

9293

Presented by ^{Chas E} Dr. Banks. Asst. Surg. Marine Corps. Service.

Ovarian tumor.

Recd. Nov. 1, 1884.

Presented by Dr. D. S. Lamb.

Case of Mrs. Maria Scipp.

9294

Died of acute peritonitis.

Recd. Oct. 24, 1884.

Left middle finger; amputated at its metacarpal articulation for an exostosis on the palmar surface of its first phalanx, by the donor.	X.C. 9295	Presented by Asst. Surgeon W.H. Corbueir, U.S.A.
Case of Thos Hopkins, D., 10th U.S. Inf. Recovered.	✓	Recd. Oct. 14, 1884.
Skull of an anencephalous foetus, from Paris, France.	9296	Purchased from Prof. H. J. Ward, of Rochester, New York.
86.		Received Nov. 1, 1884.
Cast of the cavity of the uterus, showing enlargement.	9297	Presented by J. Walter, M.D.
Case of Carrie B —, aged 37		Recd. July, 1884.
Heart, showing traumatic rupture of right ventricle.	9298	Presented by J. F. Hartigan, M.D.
Case of a colored man, aged 30 years. Injured by an embankment falling upon him. Died almost immediately after injury.	✓	Recd. Nov. 13, 1884.
A strangulated inguinal hernia. The normal testicle and appendages are attached.	9299	Presented by D. W. Prouty, M.D.
	✓	Recd. Nov. 13, 1884.

Brain, showing extravasation
of blood, after fracture
of cranium by a fall.

I.C.B. a. 4.

Presented by G. W. Cook,
M.D.

9300

Case of Dr. J. W. Van Brown,
act 44. Died five days after
injury.

✓

Recd. Nov. 21, 1884.

Skull of Badger, showing
Exostotic necrosis from
alveolar abscesses.

Sub. Section
II.

Presented by J. L. Wortman,
Anatomist, Army Med. Museum

9301

(Taxidea americana.)

✓

Recd. Dec. 4, 1884.

Kidneys; showing Bright's
disease.

Presented by F. J. Shadd,
M.D.

9302

Recd. Dec. 8, 1884.

Portion of Liver, showing
a white gall stone impacted
in gall-bladder.

9303

Presented by G. S. Palmer,
M.D.

Recd. Nov. 26, 1884.

Portion of bladder, showing
middle lobe of prostate
enlarged to size of a cherry

9304

Presented by G. S. Palmer,
M.D.

Case of Genl. C. D. Gilmore.

Recd. Nov. 26, 1884.

Portion of transverse colon, removed
post mortem.

Presented by Asst. Surgeon
Chas. M. Gandy, U.S.A.

Case of Pvt. David Brown,
Co. B, 23d Inf., aged 23 years.

9305

Wounded in left hypochondriac region
1/2 in in length & penetrating abdominal
cavity, by a knife which entered transverse
colon. Wd. Sept. 3, 1884. Died Sept. 7, 1884.
Fort Brady, Mich.

Recd. Jan. 29, 1885.

Lower jaw, showing necrosis II.C.B. 11

9306

Presented by D.S. Lamb,
Asst. Asst. Surg. U.S.A.

Recd. Dec. 23, 1884.

Esophagus, showing
ulceration; Bronchial gland,
showing large cheesy abscess,
Larynx, showing oedema;
Trachea, showing perforation.

9307

Presented by D.S. Lamb,
Asst. Asst. Surg. U.S.A.

Recd. Dec. 23, 1884.

Right lung, showing
tubercles.

9308

Presented by D.S. Lamb,
U.S.A.

Recd. Dec. 23, 1884.

Liver, showing tubercle.

9309

Presented by D.S. Lamb,
Asst. Asst. Surg. U.S.A.

Recd. Dec. 23, 1884.

Spleen, studded with
miliary and large cheesy
masses.

9310

Presented by D. S. Lamb,
Act. Surg. U.S.A.

Recd. Dec. 23, 1884.

Right kidney, tubercles
and ureter much dilated.

9311

Presented by D. S. Lamb,
Act. Surg. U.S.A.

Case of James Robinson,
a Mulatto.

Recd. Dec. 23, 1884.

Eleventh & 12th dorsal & ^{III. B. B. b.}_{13.}
1st & 2d lumbar vertebrae.

Body of 1st shows transverse fract. 9312

12th dorsal shows a fringe of ✓

exostosis. Case of Alex. Johnson, act 25,

mulatto. Injured Nov. 29th. by a rock
falling on his back. Died, Dec. 31, 1884.

Recd. Jan'y 29, 1885.

Portion of spinal cord, ^{III. B. B. b. 12}
showing groove from pressure.

9313

Presented by Dr. Lamb.

From same as preceding spec.
(9312)

✓

Recd. January 29, 1885.

A distorted conoidal ball
with fragments of bone firmly
attached, found at autopsy imbedded 9314
in orbital plate of rt. malar bone,
extending to great wing of sphenoid

Case of James Ferguson, Pvt. B,
27th U.S. I. Wounded before Petersburg,
Va., July 30, 1864. Died March
8, 1884.

✓

Presented by Thos. B. Wood,
M.D.

Recd. Mch. 19, 1885.

Heart and arch of aorta,
showing sacular aneurism
of ascending portion which
ruptured into vena cava

9315

Presented by Asst. Surgeon
W. C. Shannon, U.S.A.

Case of Sgt. S. Malloy, Co. C,
9th Inf.

Recd. Mch. 19, 1885

Portion of liver of a chicken,
showing several firm white
nodules the size of a pea
and less, and one an inch
in long diameter.

9316

Presented by Mrs.
Harriet Smith.

Recd. Mch. 20, 1885.

Tape worms, from a Dog,
(*Fascia canina*). Discharged
after administering eucalyptol.

9317

Presented by Asst. Asst.
Surgeon Wm M. Mew,
U.S.A.

Recd. Mch. 20, 1885.

Left ovary & portion of Fallopian
tube; ovary slightly enlarged;
several follicular cysts containing
granular matter; several con-
tractions of old corpora lutea.

base of Miss. Alice Thorley,
April 26, 1884.

9318

Presented by Lawson Tait, M.D.
F.R.C.S., No. 7 The Crescent,
Birmingham, England.

Recd. May 18, 1885

Ovaries and abdominal ends
of Fallopian tubes; ovaries enlarged
to 2 x 1 x 1 inches and shows follicular
cyst, filled with granular
matter.

9319

Presented by Lawson Tait,
F.R.C.S., &c.

Recd May 18, 1885.

Fallopian tubes *vsq.* One tube somewhat thickened, as from chronic salpingitis; old adhesions around it. Ovary atrophied, 9320 but no cicatricial depressions; contains a small firm blood clot. The other tube is abruptly bent by firm adhesions to an adjoining mass, apparently broad ligament containing some blood clots & a cyst as if the ovary was lost in the mass.
Mrs Jane Coates, Mch. 21, 1884.

Presented by Lawson Tait,
F.R.C.S. &c.

Recd. May 18, 1885.

Left ovary & small portion of Fallopian tube. Ovary enlarged, about $1\frac{1}{2}$ inches in diameter, nearly spherical, 9321 wall thickened, contains abscess cavity.

Mrs. Beaufort. Oct. 11, 1884.

Presented by Lawson Tait,
F.R.C.S. &c.

Recd. May 18, 1885.

Ovaries and abdominal portions of Fallopian tubes. One tube is lengthened, dilated, wall somewhat thickened, contents granular; ovary everywhere adherent & 9322 contains a cyst about one inch in diameter with granular contents. The other ovary shows cyst about the same size with firmer contents; Fallopian tube normal.

Elizabeth Tranny, Mch. 13, 1884.

Presented by Lawson Tait,
F.R.C.S. &c.

Recd. May 18, 1885.

Ovaries & abdominal portions of Fallopian tubes. Right tube shows some thickening of wall & granular contents; fimbriated extremity atrophied. Ovary converted into a cyst of walnut with thick firm wall. Left tube 9323 appears normal, except fimbriated extremity which is thickened & indurated. Ovary adherent everywhere to tube, enlarged & firm, with a few cysts. Emily Jane Wallenstern, Oct. 3, 1884. Diagnosis: Double pyosalpinx.

Presented by Lawson Tait,
F.R.C.S. &c.

Recd. May 18, 1885.

Left Fallopian tube distended with large blood clot.

Mrs. Annie Moore, Tubal pregnancy, 10th week; ruptured June 6, 1884. Laparotomy by Tait; removal of tube; abdomen full of clot.

See British Med. Jour. July 18, 1884.

Presented by Lawson Tait,
F.R.C.S. &c.

Recd. May 18, 1885.

Hepatic flexure of colon, showing small papillary growth encircling nearly entire intestine & including all the coats.

9325

Presented by J. L. Suddarth, M.D.

Case of Mrs. Doughton, aet. 62. Death from obstruction of bowels.

Recd. May 20, 1885

Ileo-colic portion of intestine, showing perityphlitis.

9326

Presented by J. L. Suddarth, M.D.

Recd. May 20, 1885.

Left kidney; surface showing cicatricial depressions; substance containing some small cysts.

9327

Presented by J. L. Suddarth, M.D.

Recd. May 20, 1885.

Brownish, branching calculus, with club ends, from pelvis and calyces of left kidney.

9328

Presented by J. L. Suddarth, M.D.

From same subject as Spec's. 9325, 9326 & 9327.

Recd. May 20, 1885.

Left tibia, showing necrosis of upper third, including tibial surface of knee joint. Amputated in middle 3d. ^{of thigh,} by Dr. C. B. Purvis Nov. 1, 1884, at Freedman's Hosp., Washington, D.C. Recovered.

XIV. C. 23.

9329

Presented by Dr. C. B. Purvis.

Case of James B. H., Colorado, aged 20.

Recd. Apl. 14, 1885.

Skull of a stillborn hydrocephalic female, infant, showing abnormally incised margins & craniotatic openings.

9330

Presented by Dr. P. J. Murphy, Surgeon in Charge of the Columbia Hospital, Washington, D. C.

Recd. Nov. 28, 1884.

Portal membranes at tenth week, showing an aborted fetus a few lines in length

9331

Presented by Mary Parsons, M. D.

Recd. March 30, 1885.

Upper jaw, showing sarcoma. II. C. A. 6
Upper jaw converted into large sarcomatous tumor.
From Brooklyn Naval Hospital.

9332

Presented by the Museum of Hygiene, Navy Dept., Washington, D. C., J. M. Brown, Med. Director, U. S. Navy, in charge.

Recd. April 20, 1885.

Portion of small intestine, XX
from about midway of tract,
showing small strangulated left
inguinal hernia; two-thirds
of neck of sac firmly adherent;
hernial portion shows incipient gangrene.
Case of Jas. Jaxon, Colored.

9333

Presented by et al. Am. Surg. D. S. Lamb, M. D.

Recd. March 26, 1885.

Choroid plexus from right anterior corner, showing cyst the size of a pea.

9334

Presented by W. W. Johnston, M. D.

Recd. April 7, 1885.

Gall-bladder atrophied to
a mere pervious cord, cal-
culus size of a pea in fundus.

Presented by W. W. Johnston,
M. D. 9335

Case of ulc. — French,
Vice Consul, had had melancholia
for five years.

Spec. 9334 from same subject.

Recd. April 7, 1885.

Large diphtheritic cast 15 inches
long from fauces, pharynx, and
apparently the entire length of
oesophagus; intermixed with
blood.

Presented by H. D. Fry, M. D. 9336

Case of Annie H. S. — white

Recd. April 11, 1885.

Section of the colon, from ileo-
caecal valve, to descending colon,
illustrating intussusception of
bowels. 9337

Presented by Asst. Surgeon
Henry O. Perley, U.S.A.

Case of a child 11 weeks
old.

Recd. April 28, 1885.

Abdominal aorta, showing
aneurism of two inches of
anterior wall. 9338

Presented by Asst. Surgeon
R. C. Newton, U.S.A.

Case of George W. Gillette, a
civilian.

Recd. Feb. 17, 1885.

Heart, showing hypertrophy of
wall of each ventricle & white
dots in all the cavities. Mitral
valves show atheromatous nodules;
aortic valve thickened, contracted
& with several tumor like atheromatous
projections from free margin. Aorta
slightly atheromatous. 9339

Presented by Asst. Surgeon
W. O. Gorgas, U.S.A.

Case of a Negro man, aet. 36.

Recd. Feb. 26, 1885.

Abdominal aorta & common iliac arteries. Aorta shows fusiform aneurism, involving entire tract of vessel below renal branches.

9340

From Brooklyn Naval Hospital
No history.

Presented by J. M. Brown,
Medical Director, U.S. Navy.

Recd. Mch. 13, 1885.

Heart, showing hypertrophy and dilatation both sides. Aorta shows fatty degeneration of endothelium.

9341

Case of Pvt. Chas. Ancor,
Signal Corps, U.S.A.

Presented by Surgeon
R. S. Vickory, U.S.A.

Recd. April 10, 1885.

Uterus, appendages, portions of bladder, rectum & sigmoid flexure, showing ulcerating cancer & inflammation.

9342

Case of Mrs. Ellen. Wood.

Presented by Geo. Henderson,
M.D.

Recd. Mch. 13, 1885.

Two supernumerary fingers, removed from just below little finger of each hand of a negro boy of four months. Operation by the donor.

9343

Presented by Act. Asst. Surg.
H. C. Yarrow, U.S.A.

Recd. Apl. 15, 1885.

Heart, weighing 20½ oz, showing hypertrophy & dilatation both sides; mitral valves markedly atheromatous & calcareous; aortic valve slightly thickened; several small patches of pericarditis.

9344

Presented by Daniel H. Riggs,
M.D.

Case of Dr. W. K. S. - died from valvular disease of heart.

Recd. Apl. 28, 1885.

Tongue, fauces, portion of
pharynx and larynx, showing
epithelioma.

9345

Presented by G. W. Cook,
M.D.

Case of L. F. colored
man.

Recd. May 14, 1885.

Monstrosity. Strophocephalus. Skull
of a new born lamb.

9346

Presented by Surgeon
F. L. Town, U.S.A.

Recd. May 9, 1885.

Skin & head of new born lamb,
showing on under surface the
two eyes approximated, the
two ears likewise & between the
bases of the ears an opening half
an inch in diameter into the
pharynx.

9347

Presented by Surgeon
F. L. Town, U.S.A.

Recd. May 9, 1885.

Portion of upper surface of
right lobe of liver, showing
cavernous angioma.

9348

Presented by Asst. Surg.
D. S. Lamb, U.S.A.

Case of Moses Williams,
a light mulatto.

Recd. May 15, 1885.

Portion of large intestine, showing
cancerous tumor &c.

9349

Presented by J. N. Muddell,
M.D.

Recd. May 6, 1885.

Uterus & appendages, showing
abscess cavity of broad lig-
ament $1\frac{1}{2}$ in in diameter, with
grayish corrugated lining; outer
surface adherent to tube & shows
thickening & ulceration.

Mrs. Etta Connell.

Presented by T. C. Smith,
M. D.

Recd. May 5, 1885.

Two biliary calculi articulating
with a third, extracted from
rectum by the donor.

Case of Mrs. C. W. act. 50.

Presented by Christopher,
Johnston, M. D.

Recd. June 1, 1885.

Foetus (human) with
membranes, aged about
3 weeks

Presented by Llewellyn
Eliot, M. D.

Recd. June 29, 1885.

Cranium, showing shot
fracture.

Case of Pvt. Wm. Linkel
Co. A, 22d Inf. suicide
Nov. 24, 1884, Springfield
rifle, cal. 45. Died Nov.
24, 1884.

107-3

I. A. B. a
66.
9353

Presented by Asst. Surg.
J. A. Cunningham, U.S.A.

Recd. Jan. 10, 1885.

An oblong dumbbell shaped
vesical calculus, weighing
106 grains. Supposed to have
formed in the ureter. Lithotomy
by the donor.

Presented by Christopher
Johnston, M. D.

Recd. July 6, 1885.

A flat vesical calculus,
weighing 185 grains. Removed
by lithotomy from Thos Barnes,
May 25, 1872, by the donor.

9355

Presented by Christopher
Johnston, M. D.

Recovered.

Received July 6, 1885.

Fragments of vesical calculus,
weighing 41 grains. Removed
by lithotomy, July 2, 1875,
from a boy aged 13 years,
by the donor.

9356

Presented by Christopher
Johnston, M. D.

Recd. July 6, 1885.

Fragments of vesical calculus,
weighing 236 grains. Removed
by lithotomy by the donor.

9357

Presented by Christopher
Johnston, M. D.

Recd. July 6, 1885.

A flat vesical calculus,
weighing 211 grains.
Removed by lithotomy by
the donor.

9358

Presented by Christopher
Johnston, M. D.

Recd. July 6, 1885.

Fragments of vesical cal-
culus, weighing 195 grains.
Removed by lithotomy, from
Captain Colston, by the donor,
Dec. 3, 1865.

9359

Presented by Christopher
Johnston, M. D.

Recd. July 6, 1885.

Urethral calculus, weighing
just 2 grains. Removed by
the donor, May 17, 1869, from 9360
Rose, a boy aged
3 years.

Presented by Christopher
Johnson, M.D.

Recd. July 6, 1885.

Two vesical calculi & a
portion of a third weighing
together 140 grains. Removed 9361
by lithotomy June 3, 1880, by
the donor. From L. Welsh,
of Liberty, Md.

Presented by Christopher
Johnson, M.D.

Recd. July 6, 1885.

A vesical calculus, weighing
55 grains. Removed by lithotomy
June 23, 1869, from James 9362
Rodgers, aged 14 years, by
the donor.

Presented by Christopher
Johnson, M.D.

Recd. July 6, 1885.

A vesical calculus, weighing
16 grains, passed by urethra.
A boy, aged 9 years 9363

Presented by Christopher
Johnson, M.D.

Recd. July 6, 1885.

Fragments of a vesical
calculus, weighing 49 grains.
Removed by lithotomy, January 9364
2, 1885, by the donor.

Presented by Christopher
Johnson, M.D.

Case of George Clark,
aged 3 years.

Recd. July 6, 1885.

Fragments of a vesical calculus, weighing 169 grains. Removed by lithotomy, by the donor,

9365

Presented by Christopher Johnston, M.D.

Recovered.

Recd. July 6, 1885.

A vesical calculus, weighing 161 grains, having a straw for a nucleus. Removed by lithotomy, May 11, 1881, by the donor.

9366

Presented by Christopher Johnston, M.D.

From — Zimmerman

Recd. July 6, 1885.

Two vesical calculi, weighing respectively 82 & 22 grains. Larger one from R. V. Storke, smaller from N. Simpson, both children, aged 3 years. Removed by lithotomy by the donor, Nov. 9, 1872, at Balto. Infirmary.

9367

Presented by Christopher Johnston, M.D.

Recd. July 6, 1885.

Fragments of vesical calculus, weighing 276 grains. Removed by lithotomy, from John M. Cornick, aged 37 years, by the donor, at Baltimore Infirmary.

9368

Presented by Christopher Johnston, M.D.

Recd. July 6, 1885.

Fragments of two vesical calculi, weighing 509 grains (said to have been originally 756 grains). Removed by lithotomy by the donor, Mch. 21, 1885. One sitting of 3½ hours. Case of Peter Harmon.

9369

Presented by Christopher Johnston, M.D.

Recd. July 6, 1885.

Vesical calculus, weighing
245 grains. Removed by lithotomy
by the donor, in 1861. From 9370
a patient aged 28 years.

Presented by Christopher
Johnston, M. D.

Recd. July 6, 1885.

Fragments of vesical calculus,
weighing 110 grains. Removed
by lithotomy by the donor, 9371
Oct., 1871.

Case of J. R. Kenny, aged
6 years.

Presented by Christopher
Johnston, M. D.

Recd. July 6, 1885.

Mulberry vesical calculus,
weighing 235 grains. Removed
by lithotomy by the donor, 9372
in Oct., 1871.

Case of a boy aged
14 years.

Presented by Christopher
Johnston, M. D.

Recd. July 6, 1885.

A vesical calculus, weighing
421 grains. Removed by
lithotomy by the donor. 9373

Case of R. Oliver, aged
17 years. Fatal.

Presented by Christopher
Johnston, M. D.

Recd. July 6, 1885.

A vesical calculus, weighing
360 grains. Removed by
lithotomy by the donor, 9374
Dec. 4, 1871.

Case of Henry Branch,
aged 12 years.

Presented by Christopher
Johnston, M. D.

Recd. July 6, 1885.

A vesical calculus, weighing
2 oz. 6 dr. Removed by
lithotomy by the donor, May, 1885. 9375

Presented by Christopher
Johnston, M.D.

Recd. July 6, 1885.

Plaster cast of a vesical
calculus, which weighed
13 ounces & measured $10\frac{3}{4} \times$ 9376
 $7\frac{1}{8}$ inches; composed of phos-
phates. Case of Mr. J. Marr; died
of double pneumonia, Aug. 5, 1867
calculus found at autopsy.

Presented by Christopher
Johnston, M.D.

Recd. May 29, 1885.

Lumbricoid worm, from
intestine of a dog.

Presented by Asst. Asst.
Surgeon W. M. Mearns,
9377 U.S. Army.

Recd. July 7, 1885.

Entozoon with oval cyst
like body about one inch
in diameter, filled with 9378
fluid, & small conical flattened
head with central mouth. Removed
post mortem by Dr. D. S. Lamb
from lower border of great omentum
of South African "Water Buck".

Presented by Prof. Spencer
F. Baird, Director
U.S. National Museum,
Washington, D.C.

Recd. May 10, 1885.

Liver of a domestic chicken,
showing hypertrophy to
about eight times natural 9379
size.

Presented by Mr.
Geo. P. Bohrer, of
Washington, D.C.

Recd. March 13, 1885.

Uterine Cancer.

Presented by Dr. J. Taber Johnson,

9380

Recd. May 29, 1885

Trichina spiralis, male
and female. Made under
direction of Prof. Leuckart, 9381
Director of the Zoological
Institution of the University of
Leipzig ✓

Purchased.

Recd. July 18, 1885.

Demodex folliculorum,
magnified 400 times.
Made under direction of 9382
Prof. Leuckart.

Purchased

Recd. July 18, 1885.

Sarcoptes scabiei ♀,
magnified 400 times. Made
under direction of Prof. 9383
Leuckart.

Purchased

Recd. July 18, 1885.

Sarcoptes scabiei ♂,
magnified 400 times.
Made under direction of 9384
Prof. Leuckart.

Purchased

Recd. July 18, 1885.

Head of bothriacephalus
latus. Made under direction
of Prof. Leuckart.

9385

Purchased.

Reed July 18, 1885.

Head of Tarnia solium.
Made under direction of
Prof. Leuckart.

9386

Purchased.

Reed. July 18, 1885.

Oval calculus, weighing
two grains, probably phosphatic.
Came away from under
the tongue.

9387

Presented by Mary Parsons,
M.D., Washington, D.C.

Case of G.C. White, male, aged
19 years & 11 mo.

Reed. Aug. 13, 1885.

Heart, showing pulmonary
valve with four leaflets.

9388

Presented by S.F. Armstrong,
Passed Asst. Surgeon,
U.S. Marine Corps. Service.

From a colored girl, aged
12 years. Died of scrophulosis.

Reed. Aug. 14, 1885.

Lower end of ileum and
head of colon which was
invaginated in ascending
colon. Ileum shows irregular
punched-out deeply penetrating
ulcers. Head of colon shows
excessive thickening, infiltration,
gangrene & sloughing. Ascending
colon dilated. Case of J. Simons,
negro, est. 37. Cabin boy.

9389

Presented by S.F. Armstrong,
Passed Asst. Surg. U.S.
Marine Corps. Service.

Reed. Aug. 14, 1885.

Oval calculus, probably phosphatic, weighing 7 grs., probably from submaxillary duct. 9390

From a colored woman, aged about 25 years. Had had swelling & pain under right side of tongue & finally spontaneous expulsion of calculus.

Presented by C.B. Gilbert, M.D.

Recd. Aug. 19, 1885.

Branching calculus, probably phosphatic, weighing 135 grs., from right kidney. 9391

From dissecting room subject, colored woman, aged about 50 years.

Presented by C.B. Gilbert, M.D.

Recd. Aug. 19, 1885.

Heart of an infant, showing malformation. 9392

87-4

Presented by P. J. Murphy, Surgeon in Charge of Columbia Hospital, Washington, D.C.

Recd. Sept. 2, 1885.

Bladder, prostate gland &c. - Bladder hypertrophies. 9393

105-3

From Lieut-Col. Carl G. Freudenberg, U.S.A., retired

Presented by Asst. Surg. R. M. O'Reilly, U.S.A.

Recd. Aug. 29, 1885.

Penis, prostate gland, and portion of bladder which is hypertrophied. 9394

104-5

Presented by D.S. Lamb, Asst. Asst. Surg. U.S.A.

Recd. Aug. 31, 1885.

(Open frontal suture)

calvarium, showing extensive
shot fracture of the frontal,
parietal & temporal, sphenoid & sup.
maxillary bones. Case of
Pvt. Jos. Welch, Co. K, 1st Cal. aged
44^{years} & 3 mo. - Wounded at Target Practice
accidentally by Springfield rifle, Cal. 45
May 23, 1885 - Lived 3 hours & 25 minutes.

T.A.C. a.

Portion of fundus of uterus, removed by galvanic cautery, through abdominal section. To its posterior surface is attached a large cyst with thick walls which show many broken-up firm adhesions. Microscopic examination revealed adeno-carcinoma of ovary undergoing cystic degeneration. ^{ms. m. aged 35 yrs.}

Presented by J. Taber Johnson, M.D.

9410

Recd. Oct. 4, 1885.

The sixth and upper half of seventh cervical vertebrae, showing shot comminution of anterior portion of body of each; anterior boundary of rt. vertebral foramen shot away - Spinal cord injured; almost complete paralysis. Lived 23 hours. Sgt. Abner Bowman, (act 37) "C" 6th Cav.

III R.R.L. 33

9411

Presented by Surgeon W.B. Hubbard, U.S.A.

Recd. Nov. 12, 1885.

Larvae of But-fly (*Oestrus bovis*), from the stomach of a horse.

9412

Presented by Mr. A.B. Strasbaugh.

Recd. Nov. 3, 1885.

Right eye enucleated by Dr. J.E. Black. Specimen shows opacity & perforation of cornea & intimate adhesions of cornea, iris & crystalline lens, caused by gonorrheal poisoning. Case of Stephen Leary, white. Recovered.

9413

Presented by Passed Assistant Surgeon S. T. Armstrong, U.S. Mc. H.S.

Recd. Nov. 17, 1885.

Two kidneys; right showing deep transverse fissure midway of posterior surface, well marked cirrhosis & some atrophy; left kidney extremely atrophied; pelvis of ureter large, much thickened and contains calculus size of a pea.

9414

Presented by Passed Assistant Surgeon S. T. Armstrong, U.S. Mc. H.S.

Case of Thomas Doran, act, 29. Died Jan. 1, 1885, at Memphis City Hospital.

Recd. Nov. 12, 1885.

Left foot and lower third of left leg, showing grossal hypertrophy &c. Amputated above the knee, Oct. 21, 1885, for elephantiasis,

9415

Presented by Passed Assistant Surgeon S. T. Armstrong, U.S. M. H.S.

Case of Richard Bailey, a negro, aet. 38. Nov. 9th, patient had progressed well; wound cicatrized.

70-9

Recd. Nov. 12, 1885.

Portion of flat tumor, probably fibroma, removed from surface of nose, after death.

9416

Presented by J. E. Black, M.D. through Passed Asst. Surgeon S. T. Armstrong, U.S. M. H.S.

Case of a Malatta boy, aged 11 years. Tumor congenital. Died of tetanus after attempted removal of tumor

107-24

Recd. Nov. 12, 1885.

Portion of small intestine, showing wounded opening (knife wd) one-fourth inch in diameter. This piece was resected from spec. 9418. Case of Richard Moody, colored, train porter, stabbed. Resection of intestine by Dr. G. B. Thornton, Sept. 6, 1885. Lived 13 hours.

9417

Presented by Passed Asst. Surg. S. T. Armstrong, U.S. M. H.S. & G. B. Thornton, Surgeon to C.O. & S. W. R.R.

Recd. Nov. 12, 1885.

Portion of intestine, which shows the sutures in intestine & mesentery.

Several inches beyond the sutures is an adherent portion of small intestine

9418

Presented by Drs. Armstrong & Thornton.

showing an opening $\frac{1}{4}$ in in diameter corresponding with the adhesion, & said also to have been a knife wound.

From same subject as preceding specimen

65-6

Recd. Nov. 12, 1885.

Portion of small intestine, showing oval longitudinal perforation three-fourths inch long diameter, with worted edges, involving a Peyer's patch.

9419

Presented by Doctor J. D. Hartigan.

Case of Patrick Bennett, kicked in the abdomen.

✓

Recd. Nov. 6, 1885.

Death 12 hours afterwards.

65-6

Ileo-colic portion of intestine,
showing enlarged Peyer's patches
and solitary follicles; pinpoint
ulcers in caecum. 9420

Case of Emma Brown, a
mulatto girl, aged 2 years 1 mo.
Death from typhoid fever.

Presented by D.C. Patterson,
M.D.

Recd. Nov. 7, 1885.

^{margin of upper}
Lower lobe of right lung, showing
a large hemorrhagic infarction
of lower margin, one inch deep & 2.
5 inches wide at base. 9421

Mulatto girl, act about 7 yrs.
Death from pneumonia.

Presented by G.D. Cook, M.D.

Recd. Dec. 3, 1885.

Lower margin of upper lobe
of left lung, showing marked
emphysema. 9422

Case of John F. Harris,
a negro, act. 75. Death
from pneumonia.

Presented by A.A. Surg.
D.S. Lamb, M.D.

Recd. Dec. 5, 1885.

Portion of lower ileum, showing
disease. 9423

Presented by Asst. Surg.
P. F. Harvey, U.S.A.

Case of James F. Harrold,
U.S. Signal Service.
Death from typhoid fever.

Recd. Nov. 9, 1885.

Pig

Purchased.

9424

Recd. Nov. 8, 1885.

Eyes of kitten, showing large
exudation in the posterior chamber,
and staphyloma, with opacity
of cornea. Duration of disease,
a week or ten days.

9425

✓

Presented by Lt. Lt. Surg.
D. S. Lanth, U.S.A.

Recd. Nov. 28, 1885.

Plaster cast of parts of right
forearm and hand, showing
surface appearance in
fracture of radius.

Recd. Dec. 7, 1885.

Left lung of female monkey
(*Macacus pelops*), showing
especially in upper lobe,
tubercular cavities. Some
pleuritic threads between
lobes.

9427

Presented by Prof. Spencer
F. Baird, Director U.S. Nat.
Museum, Washington, D.C.

Recd. Dec. 8, 1885.

Portion of lung of a dolphin
(*Delphinus delphis*), showing on
surface tubercular mass
several lines in diameter.

9428

see no. 2552 sect. Comparative
Anatomy.

Presented by Prof. Spencer
F. Baird, Director, U.S. Nat.
Museum, Washington, D.C.

Recd. Dec. 8, 1885.

Heart, showing hypertrophy,
dilatation and pericarditis.
Aortic valve composed of only
two segments, anterior & posterior,
the latter normal, the former
somewhat thickened. Aorta
showing atheroma & dissecting
aneurysm.

9429

Presented by G. L. Magruder,
M.D.

Recd. Dec. 11, 1885.

Liver, showing two firm yellowish white tumors continuous with normal tissue, one occupies the flat left border; the other larger is $3 \times 1 \frac{1}{2} \times 1$ inches and extends obliquely through right lobe.

From colored stillborn infant.

See Spec. 9431.

Presented by B. G. Pool,
M.D.

Recd. Dec. 16, 1885.

Portion of placenta, the fetal surface of which is studded with small thickenings of the membrane; probably inflammatory.

From same as preceding Spec. 9430

Presented by B. G. Pool,
M.D.

Recd. Dec. 16, 1885.

Lower lobe of right lung; studded with cheesy tubercle & showing one large omica.

From a male monkey

(*Macacus sinicus*). Died of pulmonary consumption.

See 9433.

Presented by Prof. Spencer
F. Baird, Director U.S.N.
Museum, Washington, D.C.

Recd. Dec. 18, 1885.

Portion of trachea & bronchial glands around bifurcation; one gland is enlarged to one inch in diameter & is filled with pus. From same as preceding Spec. 9432

Presented by Prof. Spencer
F. Baird, Director U.S.N.
Museum, Washington, D.C.

Recd. Dec. 18, 1885.

Fused kidney, with two hili and two sets of vessels.

From a dissecting room

subject, a colored man, age 40; said to have died of heart disease.

Presented by John W. Bovee,
M.D.

Recd. Dec. 18, 1885.

Right kidney and supra-renal capsule; kidney normal; supra-renal capsule converted into a soft cancerous growth $4 \times 3.5 \times 3$ inches, adherent above to liver.
From a woman, aet. 35.

9435

Presented by F. J. Shadd, M.D.

Read. Dec. 18, 1885.

165-3

Lower jaw, ~~rat~~ of a hen (*Gallus Domestica*), showing new growth in mucous membrane of floor of mouth to left of tongue.

9436

N 6 46

Presented by C. A. Norton, M.D.

Read. Dec. 22, 1885.

Portion of ileum, showing oral opening of rupture, about one-half inch in diameter; patches of lymph plastered over peritoneum.

9437

F. B., colored, aet. 30, kicked in the abdomen. lived 48 hours.

Presented by J. S. Hartigan, M.D.

Read. Dec. 18, 1885.

Portion of branch of brachial artery, showing aneurismal dilatation & thickening of wall from inflammation. Said to be sequel of fracture of humerus.

9438

Ed. Knicker, aged 10 years

Presented by Asst. Surgeon A. C. Girard, U.S.A.

Read. Dec. 30, 1885.

62-9

Fractured left femur.

XIII. A.B. 6.
203.

Presented by S. T. Armstrong, Passed Asst. Surg. U.S. M.H.S.

Case of M. Stratton, aet. 48. was shot in left thigh Oct. 1883. Bullet found encysted on inner side of femur, an inch below fracture. Recovered in 3 or 4 months. Admitted U.S. Marine Hospital, Memphis, Tenn. Nov. 23, 1885, for tuberculosis. Died Dec. 24, 1885.

9439

Read. Jan. 14, 1886.

Fifty-three renal calculi
found in the kidney of a cow.

9440

Presented by David Flynn,
Surgeon Genl's Office.

Recd. Jan'y 16, 1886.
Ackd.

Maggots (208) from nose.

Case of Pvt. Edward Martin, 9441

art. 29. Co., C. 4th U.S. Cavalry.

Died Oct. 11, 1885, from Ovaria.

Presented by Asst. Surgeon
P. R. Egan, U.S.A.

Recd. Jan'y 2, 1886.

Skull of an eight months foetus;
foetus born alive — defective
development.

9442

See Spec. 9443 Sect. I

Presented by H. A. Robbins, M.D.

87-4

Recd Feb. 18, 1886

Portion of upper posterior
part of cerebrum, showing a
somewhat flattened sessile tumor
of dura mater. From spec.

9443

9442 Sect. I.

Presented by H. A. Robbins,
M.D.

87-4

Recd. Feb. 18, 1886.

Portion of brain, including great
ganglia of cerebrum, pons and
medulla, a patch of softening size
of pea in internal capsule and
adjoining posterior part of nucleus can-
datus, left side. All the arteries ather-
omatous; cartilages calcareous.

9444

Case of Mrs. Goodno, art 66, white

Died Feb. 11, 1866.
See Spec. 9445.

Presented by G. S. Palmer, M.D.

Recd. Feb. 26, 1866.

Gall bladder & colon, showing disease		Presented by G. S. Palmer, M. D.
From preceding spec. 9444.	9445	
		Recd. Feb. 26, 1886.
Heart, showing shot injury, involving both ventricles.	9446	Presented by J. B. Hartigan, M. D.
Case of J. C., aet. 14, colored Accidentally shot Feb. 20, 1886. Died Feb. 20, 1886. Lived about 4 minutes.	✓ 61 - 2	Recd. Feb. 25, 1886.
Stomach, showing hemorrhagic ulcers.		Presented by Act. Asst. Surg. D. S. Lamb, U.S.A.
From a case of dementia. Mary Baltimore, colored, aet. 65. See Spec. 9448	9447	Recd. Feb. 13, 1886.
Vermiform appendix	9448	Presented by Act. Asst. Surg. D. S. Lamb, U.S.A.
From preceding specimen 9447		Recd. Feb. 13, 1886.
(Uterus). Papilloma. The tumor was removed by the donor.	9449	Presented by Doctor C. H. A. Klineschmidt.
See Jour. Amer. Med. Ass. Mch. 6, 1886, p. 272		
From a preachee, between 60 & 70 years of age.	✓ 70 - 5	Rec. Mch 6, 1886.

Stomach & spleen of a still-born male infant, showing small accessory spleen corresponding 9450 to a hiatus in anterior border of spleen. Infant weighed 5 lbs, 10 oz; lungs airless.

Presented by C.B. Purvis, M.D.

Recd. Mch. 16, 1886.

Left kidney, showing disease.

Presented by J. W. Blackburn, M.D., of Govt Hspl for the Insane, D.C.

9451

Recd. Mch. 19, 1886.

Lower third of left femur, showing cavity in inner condyle. A leaden bullet was found lodged in the cavity. The spec. shows exostosis Case of

Pvt. R. P. Clark, Co. H, 4th Pa. Cav. Thigh amput. Sept. 17, 1883. Wd. 1865.

9452

Presented by M. Pickett, M.D., of Corry, Penna.

Recd. Mch. 22, 1886.

Right kidney and adjacent lumbar glands, showing cancer.

9453

Presented by Doctor E. W. Bliss.

man died Mch. 6, 1886.

Recd. Apl. 2, 1886.

Arch of aorta and branches, and portion of trachea; showing disease.

9454

Presented by Act. Asst. Surg. D. S. Lamb, U.S.A.

Case of Michael Hahn, single, white, aged 56 years. Bavarian, M.C. from La. Wounded in thigh, in New Orleans, La., June, 30, 1886. Found dead in his room in Washington, D.C., Mch. 15, 1886.

See Specimens 9455 & 9456.

Recd. Apl. 2, 1886.

Portion of liver, showing gall bladder atrophied & a small gall-stone lodged in neck. 9455

There is also depression most marked at the angle. Adam Schlosser, inmate of U. S. Soldiers Home, D.C. Suicide by drowning. Old wound, not caused by shot.</p>	9668	<p>Presented by Surgeon C. C. Byrne, U. S. Army. Recd. Aug. 28, 1886.</p>
<p>Left lung of a female monkey (<i>Macacus niger</i>), showing thickened patches & bands of inflammation of pleura.</p>	9669	<p>Recd. from U. S. National Museum, Washington. Recd. Nov. 5, 1886.</p>

<p>Portion of ileum of female Monkey, three feet from ileo-colic valve, showing invagination.</p> <p>See Spec. 9669</p>	9670	<p>Recd. from U.S. National Museum, Washington.</p> <p>Recd. Nov. 5, 1886.</p>
<p>Portion of ileum of female monkey, showing Peyer's patch slightly thickened & with minute ulcers.</p> <p>See Specs. 9669 & 9670.</p>	9671	<p>Recd. from U.S. National Museum.</p> <p>Recd. Nov. 5, 1886.</p>
<p>Lower end of ileum and portion of colon of female monkey. Solitary follicles are much enlarged and contained a dark pus-like matter. See Specs. 9669, 9670 & 9671 & 9677.</p>	9672	<p>Recd. from U.S. National Museum.</p> <p>Recd. Nov. 5, 1886.</p>
<p>A group of mesenteric glands from female monkey, enlarged & firm.</p> <p>See Specs. 9669, 9670, 9671, 9672 & 9673 & 9677</p>	9673	<p>Recd. from U.S. National Museum.</p> <p>Recd. Nov. 5, 1886.</p>
<p>Stomach and small intestine of full grown female cat, showing enlarged mesenteric gland. There is a polypus, size of small pea, in small intestine.</p>	9674	<p>Presented by Dr. D.S. Lamb.</p> <p>Recd. Nov. 5, 1886.</p>

Tongue, larynx and portions
of trachea & oesophagus. On
anterior part of left vocal chord 9675
is a tumor size of pea. Fungiform
papillae of back of tongue en-
larged. Thyroid gland large.
Peter Shipley, a Mutatto.

Presented by Asst. Asst. Surg.
G. S. Lamb, U.S.A.

Recd. Nov. 24, 1886.

Group of lymphatic glands
from neck, showing enlarge-
ment and yellow cheesy 9676
deposits, in some places softened
to a pulp. From a Cow
(Bos Domesticus)

Presented by F. B. Kilborne,
Vet. Surg.

Recd. Nov. 19, 1886.

Spleen of Monkey, showing
capsule thickened in patches.

Presented by Fred K. Lucas,
Anatomist, Nat. Mus., D.C.

9677

See 9669.

Recd. Nov. 5, 1886.

Kidney & ureter. Kidney
shows malformation, inflammation
and cysts. Ureter shows dil-
atation.

Presented by Dr. G. S. Palmer,
Washington, D.C.

9678

Recd. Dec. 6, 1886.

Bladder, showing opening
of rupture, one-half inch in
diameter, in anterior wall, just
posterior to entrance of urethra.

Presented by Asst. Surgeon
M. W. Wood, U.S. Army.

9679

Pvt. Joseph O'Brien, Troop "F."
2d Cav., aged 35. Kicked
by his horse, Sept. 22, 1886 -
Died Oct. 9, 1886.

Recd. Nov. 20, 1886.

Portion of ileum of child, aet. 5,
showing large sarcomatous tumor,
involving entire circumference.

9680

Presented by J. P. Yarnall,
M. D.

Case of Lewis Thomas.

Died Dec. 5, 1886.

Recd. Dec. 11, 1886.

Portion of ileum, from near the
ileo-colic valve, showing invagin-
ation. From an adult male African
Porcupine (*Hystrix cristata*)

9681

Presented by Prof. S. F. Baird,
Director. U.S.N.M. W. D.C.

Recd. Dec. 10, 1886.

Three tricephalus dispar, from
caecum of African Porcupine,
(*Hystrix cristata*)

9682

Do.

Recd. Dec. 10, 1886.

Portion of liver, showing in
free edge a whitish worm doubled
on itself, one-half inch long and
one-sixteenth in' in diameter

Plaster Cast of portion of arm
and forearm, showing partial
dislocation outwards.

9697

Purchased.
"Hamilton Collection".

Catalogued June 3, 1887.

Plaster Cast of portion of
right arm, forearm & hand;
dislocation, also Colles'
fracture. Resection.

9698

Purchased.
"Hamilton Collection".

Catalogued June 3, 1887.

Plaster Cast of portion of right
forearm and hand of patient 18
years old, showing unreduced
dislocation of elbow.

9699

Purchased
"Hamilton Collection"

Catalogued June 3, 1887.

Plaster Cast of right foot and ankle of child, after excision of astragalus + $\frac{3}{4}$ inch of tibia & fibula.

From a child 4 years old.

9700

Purchased.
"Hamilton Collection".

Catalogued June 3, 1887.

Plaster Cast of anterior aspect of right knee + adjacent portions of thigh + leg, ~~etc~~ - dislocation of head of tibia.

Wm H., age 32 - injured by fall.

9701

Purchased.
"Hamilton Collection".

Catalogued June 3, 1887.

Two plaster casts of anterior aspect of right side of chest, base of neck and shoulder showing carbuncle over clavicle. In 9702 it appears a livid mound-shaped prominence.

In 9703 a later stage shows a livid Centre etc.

to history.

9702

Purchased.
"Hamilton Collection".

Catalogued June 3, 1887.

See 9702.

9703

Purchased.
"Hamilton Collection".

Catalogued June 3, 1887.

Plaster Cast of same portion of the body, not determinable, showing a carbuncle several inches in diameter at base - etc.

to history

9704

Purchased.
"Hamilton Collection".

Catalogued June 3, 1887.

Plaster Cast of anterior aspect
of left knee and portions of adjacent
thigh & leg, showing "housemaids knee". 9705
The tumor is pendulous. 3.5 inches
in diameter & at base.

Ellen Lee, aged 26 years,
Tumor existed 3 years.

Purchased -
"Hamilton Collection".

Catalogued June 3, 1887.

Plaster Cast of anterior aspect
of right knee & adjacent portions
of thigh & leg, showing "housemaids
knee". The tumor is conical and
directed somewhat outwards. 9706

No history.

Purchased.
"Hamilton Collection"

Catalogued June 3, 1887.

Plaster Cast of anterior aspect
of right knee, showing housemaids
knee. The tumor is broad, rounded
and prominent. 9707

No history.

Purchased
"Hamilton Collection"

Catalogued June 3, 1887.

Plaster Cast of lower part
of face & portion of neck,
showing mound-like swelling
below & behind chin. 9708

Rogers Nyack, N.Y., aged
16 years.

on Surgery, 2d Ed. p. 635. Med. Gazette
N.Y., 1867-8 I. p. 156 & Hamilton's Case Book 8 p. 150.

Purchased.
Hamilton Collection.

Catalogued June 3, 1887.

Plaster Cast of alveolar processes
of upper jaw, & roof of mouth,
showing extensive congenital
cleft palate, into which a "Kingsley's
artificial palate" has been inserted. 9709

No history.

Purchased
"Hamilton Collection".

Catalogued June 3, 1887.

Plaster cast of portion of upper jaw & roof of mouth, including soft parts, showing on right side an osteoma two inches long, 1.5 wide & one, thick	9710	Purchased. "Hamilton Collection"
No history.	✓	Catalogued June 3, 1887.
Plaster Cast of portion of upper jaw & roof of mouth, including soft parts, showing perforation of palatine vault, close to incisor teeth. Probably of syphilitic origin.	9711	Purchased. "Hamilton Collection".
No history.	✓	Catalogued June 3, 1887.
Plaster cast of face, showing red, rounded, cylindrical mass, protruding from left nostril, one & one-fourth inch in diameter & nearly as much in length. Said to be fleshy polypus of nostril.	9712	Purchased. "Hamilton Collection".
	✓	Catalogued June 3, 1887.
Plaster cast of face, showing a vascular lobulated tumor.	9713	Purchased. "Hamilton Collection"
	✓	Catalogued June 3, 1887.
No history.	✓	Catalogued June 3, 1887.
Plaster cast of left side of face & portion of head & neck, showing vascular ulcerated tumor, five inches in long diameter 3.5 inches broad & 2 in height.	9714	Purchased. "Hamilton Collection"
No history.	✓	Catalogued June 3, 1887.

Plaster Cast of the right foot
and ankle of young child,
showing large mound like
swelling over external malleolus.
Said to be from a case of Medullary
Sarcoma of ankle joint.
Amp. above joint by Dr. Hamilton.

9715

Purchased
"Hamilton Collection".

Catalogued June 3, 1887.

Plaster Cast of anterior portion
of left leg, showing prominent
rounded mass, said to be a medullary
Sarcoma. Limb amputated.

9716

Purchased.
Hamilton Collection

No history

Catalogued June 4, 1887.

Plaster cast of female external
genitals & adjoining portions of
abdomen & thighs - Said to be
epithelioma, but was more probably
condyloma.

9717

Purchased.
"Hamilton Collection"

No history

Catalogued June 4, 1887.

Plaster cast of left ankle;
showing traumatic haematoma,
injury caused by a blow from
the hand - never tender nor
painful.

9718

Purchased.
"Hamilton Collection"

Catalogued June 4, 1887.

Plaster cast of front of left
side of chest, apparently female,
showing deep ulcer of areola on
upper, inner & outer sides of nipple,
etc, etc.

9719

Purchased.
"Hamilton Collection"

Catalogued June 4, 1887.

Plaster Cast of front of abdomen
& adjoining portions of thighs,
male, showing exstrophy of bladder,
frustrated penis, epispadias and
right inguinal hernia. Probably
same case mentioned in Dr. H's "Prin.
and Prac. of Surgery" N.Y., 1872,
p. 793, Fig. 381.

9720

Purchased.
"Hamilton Collection"

Catalogued June 4, 1887.

Plaster Cast of right foot,
showing hypertrophy of 2d
toe. Tumor dissected
forwards & upwards.

9721

Purchased.
"Hamilton Collection"

Cast taken in 1849

Catalogued June 4, 1887.

Plaster Cast, taken in 1856,
of anterior portion of same
foot, as in 9721, after
amputation of toe.

9722

Purchased.
"Hamilton Collection"

From boy, aged 9 years
at time of operation. See
Dr. H's "Surgery," New York, 1872
p. 359 & figs. 150 & 151. p. 360; these
represent the left foot.

Catalogued June 4, 1887.

Plaster Cast of forehead, showing
red hemispherical tumor, above
inner side of right orbit.

9723

Purchased.
"Hamilton Collection"

— D., of Bridgeport, Conn.,
aged 24 years. Fracture of
frontal bone in 1855. Trophimet
Hernia Armbi followed. ^{died some years} after operation.

Catalogued June 6, 1887.

Wax Cast of neck of uterus
apparently of nullipara, showing
whitish translucent tumor.

9724

Purchased.
"Hamilton Collection"

Probably a cystic distention of
Nabothian gland.

Marked Dr. H.

Catalogued June 6, 1887

Plaster cast of lower part of face, showing on left half of lower lip a purplish tumor. 9725
presenting an angioma. Has labelled "aneurism by anastomosis" & erectile tumor. Removed by Dr. H. January, 1844.

Purchased.
"Hamilton Collection"

Catalogued June 6, 1887.

Plaster Cast of kidneys in high relief; its pelvis & beginning of ureter dilated, & a thickening suggesting 9726
calculus. Left kidney shows compensating hypertrophy.
J. B., Aug. 1852.
No history.

Purchased.
"Hamilton Collection"

Catalogued June 6, 1887.

Plaster Cast of central portion of face, showing absence of upper part of nose, & instead a triangular 9727
opening, showing incision for first step in rhinoplasty.

Purchased.
"Hamilton Collection".

Catherine Jones, aged 34 years.
Contracted syphilis from her husband in 1854. amp. of left foot, Dec. 18, 1869.

Catalogued June 6, 1887.

Wax cast of front of head and neck of a woman, showing result of rhinoplasty by torsion of flap 9728
from forehead.

Purchased.
"Hamilton Collection".

Catalogued June 6, 1887.

Wax cast of front of head and neck of a woman, showing loss of front half of nose, result of rhinoplasty by torsion of flap 9729
from forehead.

Purchased.
"Hamilton Collection"

Catalogued June 6, 1887.

Plaster Cast (taken two weeks after injury) of portion of calvarium of infant, showing concavity over two inches long, $1\frac{1}{2}$ wide & $\frac{1}{4}$ in' deep, representing fracture of right parietal bone. R. H., aged 5 months -

Thrown from carriage & skull fractured. 24 years afterwards patient was strong.

Plaster Cast of portion of left ^(?) side of chest, male, showing, probably, an epithelioma.

Plaster Cast of portion of arm, showing characteristic crusts of rupia.

No history.

Plaster Cast of left side of head & neck, showing artificial grouping of different forms of syphilodermata.

Plaster Cast of front of lower abdomen, adjacent thighs & female genitals, showing large condylomata involving nearly the entire vulva.

Right tibia; about midway of **B 6**
shaft is a marked forward
curvature from healing after
shot fracture; exostoses abundant.

9765.

Case of John McCune, Native
of Ireland, aged 55 years.

✓

Presented by Passed Asst
Surgeon S. T. Armstrong, U. S.
Marine Hospital Service.

Catalogued Apr. 28, 1888.

Mesenteric glands much en-
larged and indurated, form-
ing a large nodular mass.

9766.

Lymphadenoma.

Case of J. H., Negro, aged
24 years.

Ditto

Catalogued Apr. 28, 1888.

Left suprarenal capsule, much
enlarged, showing firm, white
mass occupying cortex.

9767.

Ditto

From same case as No.
9766.

Catalogued Apr. 28, 1888.

Bladder, contracted, show-
ing irregular rupture of post-
erior wall, etc., probably the
result of a fall.

9768

Case of Wm. A. Klewer,
Corpl "D", 14th Inf.

Presented by Surgeon W.
E. Waters, U. S. Army.

Catalogued Apr. 28, 1888.

Female foetus (Monstrosity).
Conception of a negress
by a white man.

9769.

Presented by Asst. Surgeon
A. C. Girard, U. S. Army.

Catalogued Apr. 28, 1888.

<p>Left tibia showing hyperostosis of entire shaft; a few slight depressions where suppuration had probably occurred. Upper half shows abundant exostoses.</p> <p>From a negro who had syphilis badly.</p>	<p>Be 45 9770 ✓</p>	<p>Presented by Dr. A. C. Highway, Cincinnati, Ohio. Catalogued Apr. 28, 1888.</p>
<p>Breastplate, imbedded in face of which are three rifle bullets, much flattened and otherwise deformed; edges of plate show two deep indentations, apparently from bullets.</p> <p>Taken from a soldier, killed at Wilderness, Va. May, 1864.</p>	<p>9771.</p>	<p>Presented by Dr. R. B. Rontecou, late Surgeon U. S. V., Troy, N. Y. Catalogued Apr. 28, 1888.</p>
<p>Skull, showing oval perforation in apex of occipital bone, and fracture with elevation in left side of frontal bone, by bullet.</p> <p>Skull was marked "Chancellorsville". No history.</p>	<p>Be 5 9772. ✓</p>	<p>Ditto Catalogued Apr. 28, 1888.</p>

<p>Right foot and malleoli, dried; lower portion of os calcis sawed off. Fourth metatarsus and phalanges absent.</p> <p>To illustrate Piragoff's amputation as modified by Dr. R. B. Rontecou.</p>	<p>9774.</p>	<p>Ditto. Catalogued Apr. 28, 1888.</p>

Lower end of right humerus, Bd 7
including the bone just above
the condyles; resection for disloca- 9775.
tion of elbow.

Case of John Riley, aged
7 years

Purchased
"Hamilton Collection".

Catalogued Apr. 28, 1888.

Large calcareous concretion
removed from elbow joint
during operation of resection, 9776.
for dislocation. Bd 46

Case of Wesley Myers, aet 32.

Ditto

Catalogued Apr. 28, 1888.

Head of right radius, Bd 42
showing marked hypertrophy,
also head of normal radius, 9777.
for comparison.

Case of Mary —, aet. 25.

Head of right radius excised
for pathological dislocation re-
sulting from hypertrophy.

Catalogued Apr. 28, 1888.

Petrous portion of left
temporal bone, showing oval
perforation $\frac{1}{4}$ inch in diameter, 9778.
leading into tympanum; the latter
enlarged by excavating caries.

Presented by Dr. Thos C.
Smith, Washington, D.C.

Catalogued Apr. 28, 1888.

M. W., colored girl, aet. nearly 15.
Had measles in infancy, followed by
otorrhoea and complete deafness.

Cerebellum with pons and
medulla; anterior part of left
hemisphere contains small abscess 9779.
cavity, which in recent state was
filled with offensive greenish pus.
Abscess from disease of bone.

Ditto

From same case as No. 9778.

Catalogued Apr. 28, 1888.

Bones of face, except lower jaw, showing cancerous ulceration.

Ba 46

9780.

Presented by Act. Asst. Surg.
D. S. Lamb, U. S. Army.

Case of John Lynch, white aged 60 years.

✓

Catalogued Apr. 28, 1888.

Calvarium, outer table shows multitude of erosions, some large and deep, others small; a few of them have perforated; there are ~~also~~ many exostoses. Inner table shows many erosions and an abundance of minute osteophytes. From a case of syphilis. James E. Johnson, colored, aet. 42.

9781.

Ditto

Catalogued Apr. 28, 1888.

Brain, atrophy

Fa 43

9782

Ditto

Catalogued June 9, 1888.

Ileo-colon portion of intestine. Vermiform appendix shows laterally an oval ulcerated perforation and a smaller opening at apex; also peritoneal adhesions. A large Peyer's patch of ileum is prominent.

9783

Presented by Dr. W. W. Johnston, Washington, D. C.

Erace Parolly, aged 7 years, white.

Catalogued Apr. 28, 1888.

Larynx and portion of trachea and oesophagus.

From a case of laryngotomy for ulceration, consequent upon syphilis.

9784.

Presented by Surgeon C. C. Byrne, U. S. Army.

Lawrence Murphy, Pt., "K", 2nd Cav. aged 39 years.

Catalogued Apr. 30, 1888.

Portion of skull, showing
caries of bone.

9785

Presented by Surg. S. W.
Horton U. S. A.

Portions of dorsal & lumbar
vertebrae — kidney-shaped
sarcomatous tumor.

9786

Contributed by Doctor
Robert T. Edes, of
Washington City, D. C.

Woman, married, age 35.
See Spec. 9787

Catalogued June 29, 1888.

Right halves of 11th & 12th
lumbar vertebrae.

9787

D. C.

From same subject as Spec.
9786.

Catalogued June 29, 1888.

Portion of sigmoid flexure
& rectum, showing disease,

9788

Presented by Surgeon
J. T. C. Middleton,
U. S. Army.

Catalogued June 30, 1888.

Base of Brain & Cerebellum,
showing marked atrophy of
left corpus striatum & to a less
extent of thalamus opticus.

9789

Presented by Det. Asst. Surg.
D. S. Lamb, U. S. A.

From case of Ella Smith,
a light mulatto.

Catalogued June 30, 1888.

Portion of skin of front of chest,
showing tattooing & an oval opening
made by a dagger.

From Pvt. John Bradley, Co. H,
8th Cav.

See 6617 Path. Sect.

Presented by Surgeon
Chas. B. Byrne, U.S.A.

9790.

Catalogued July 18, 1888.

Model of face, showing on
right cheek and nose a
hypertrophie naevus. (Wax) ^{Comp.} N 46

Prepared by T. Baretta from
spec's. in the Pathological Museum
of St. Louis Hosp., Paris, France.

Purchased

Purchased

Case of August D —
a Frenchman

Catalogued July 2, 1888.

Composition wax cast of
right side of neck, shoulder
& upper arm, showing
mycosis fungoides.

9809

Purchased from
T. Baretta, Paris, France

Catalogued July 2, 1888.

Composition wax cast of front
of chest of a woman, showing
patches of syphilitic circinate
psoriasis.

9810

N 45

Purchased from
J. Baratta, Paris, France

Catalogued July 2, 1888.

Composition wax cast of
dorsum of right hand
+ part of forearm, showing
vesicular bulbous hydroa,
or herpes iris

9811

N 44

Do.

Cat. July 2, 1888.

Composition wax cast of front
of chest of man, showing
large cicatricial keloid.

9812

N 46

Do.

Catalogued July 2, 1888.

Composition wax cast of
outer side of right leg and
foot, of an adult, showing
pemphigus vulgaris

9813

N 44

Do.

Catalogued July 2, 1888.

Composition wax cast of
inner side of right leg & foot
of a young person, showing
black cornuete ichthyosis,
or fish skin disease

9814

N 43

Do.

Catalogued July 2, 1888.

Composition wax cast of front
of chest of man, showing
patches of ~~eczema~~ ^{Pityriasis versicolor}.

9815
N 45

Do.

Catalogued July 2, 1888.

Three Composition wax casts;
one of side of left hip & buttocks; one
of front of right knee; & one of
back of right elbow, showing atrophic
striae consecutive to severe typhoid
fever in a woman. The hip
shows a scar of one of the ulcers

Catalogued July 2, 1888.

Composition wax cast of back
of right hand & wrist of
woman or child, showing
small patches of scleroderma

9814
N 43

Do.

Catalogued July 2, 1888.

of abdomen & thighs of man,
showing patches of impetigo.

9834

N 44

Do.

Catalogued July 2, 1888.

Composition was cast of outer side of right leg & foot, showing psoriasis degenerating into Eczema.

Eczematous Psoriasis.

Do.

9835

N 44

Catalogued July 2, 1888.

Composition was cast of face, of a young person, showing ulcerating & vegetating lupus of rapid progress; alae of nose destroyed. Lupus exuberans of Fuchs.

9836

N 45

Catalogued July 3, 1888.

Composition was cast of lower part of face of a woman, showing rhinoscleroma.

9837

N 43

Do.

Catalogued July 2, 1888.

Composition was cast of back of right forearm & hand of an adult, showing the skin disease called by American authors keratosis pilaris & by the French pityriasis sicca rubra pilivra.

9838

N 44

Do.

Catalogued July 3, 1888.

Composition was cast of right & middle portion of front of an adult female chest, showing in middle line, consecutive patches of scleroderma.

9839

N 43

Do.

Catalogued July 3, 1888.

Composition wax cast of left and part of right side of face of man, showing sebaceous epithelioma 9840 in all degrees; on right side ✓ 46 of nose is a large ulcer.

Do.

Canceroid acne, a simile variety of acne; epithelial acne; concrete or partial sebaceous acne.

Catalogued July 3, 1888.

Transverse section 5 x 4.5 in' in diameter of elephant tusk, showing several fractures. A round bullet 9841 is seen imbedded.

Presented by the Hon. David B. Wells, Norwich, Conn.

Weapon & missile case

Catalogued July 3, 1888.

Portion of Elephant tusk, showing large cavity, as if from fracture, followed by destructive inflammation — small bullet in cavity. 9842

Do.

In Weapon & missile case

From higher up same tusk, as preceding specimen no. 9842, showing irregular islands of tissue, & probably some degeneration. 9843

Catalogued July 3, 1888.

In Weapon & missile case

Ossified foetus (Lithopædion), human which remained 55 years in the abdomen of the mother. The bones of the right forearm & hand are conspicuous. 9844

Presented by J. B. Murfree, M.D. of Murfreesboro, Tenn.

Catalogued July 3, 1888.

Human male embryo, and
membranes at about six weeks;

Presented by T.C. Smith,
M.D.

9845

Mrs. N- aged about 28
years, white, mother of three
living children - Miscarried
Mch. 21, 1888; profuse haemorrhage.
Recovered.

Catalogued July 3, 1888.

Section of skin, showing the
figure of a woman holding
the "Union Jack", the English
flag; tattooed in blue & red.

9846

Presented by Passed Asst.
Surge. S.T. Armstrong,
U.S. M. H.S.

Catalogued July 3, 1888.

Region of left cranial canal.
canal occupied by a hemia
size of a cherry.

9847

Presented by Asst. Surg.
D.S. Lamb, U.S.A.

From case of Mrs. B.M.
Green, white - widow.

Catalogued July 3, 1888.

Human male foetus,
about five months old.

9848

Presented by H.A. Evans,
M.D.

Catalogued July 3, 1888.

Human Embryo at 68th
day

9849

Presented by Dr. Mary
B. Parsons,

Catalogued July 3, 1888.

Lower jaw of cat, showing disease.

9850

Presented by Dr. C. A. Norton.

Catalogued July 3, 1888.

Uterus and appendages of cat, about 4 years old, showing large aqueous cyst of left broad ligament.

9851

Presented by Dr. C. A. Norton.

Catalogued July 3, 1888.

Right kidney, showing in its upper end the openings of the track of a bullet.

9852

Presented by Doctor Mordecai Price.

Case of Maggie McGlinchey.
Kidney removed by laparotomy.
Recovered.

Catalogued July 3, 1888.

Double Embryos of a chicken, on the yolk; union by the thoraces.

9853

Presented by Victor Dupont, Hosp. Steward, U.S. Army.

Catalogued July 3, 1888.

Portion of diaphragm, showing perforating incised wound (one inch long) - also parts of omentum protruding through wound in diaphragm.

9854

Presented by Post. Surg. W. R. Hall, U.S. Army.

From case of Wm. Naylor, 4, 1st Cavalry.

Catalogued July 3, 1888.

Right parietal bone of new-
born infant, showing large
hematoma between bone
& pericranium.

9855

Presented by Dr. H. M.
Bennett.

Catalogued July 3, 1888.

Triple placenta, from a case
of triplets -
No history

9856

Presented by Dr. J. O. Adams.

Catalogued July 3, 1888.

Last three inches of ileum,
ileo-colic valve & portion of
ascending colon

9857

Presented by Surg. C. C. Byrne,
U.S. Army.

From case of colloid cancer
& peritonitis - Wm Austin, late
private B. 3d Cavalry.

Catalogued July 3, 1888.

Body of uterus, in fundus of wh
is a large, somewhat pyriform, myo-
fibroma; also right ovary containing
small cysts; etc -

9858

Presented by Dr. P. J. Murphy.

Case of Miss. Nellie B -

Catalogued July 3, 1888.

Stump (cervix) of uterus &
small portion of vagina

9859

Do.

From same as preceding
spec. 9858 -

Catalogued July 3, 1888.

Portion of anterior abdominal wall, middle line, above pubis, showing partly healed incision of operation of laparotomy — etc

9860

Do.

From same case as preceding Specs. 9858, 9859.

Catalogued July 3, 1888.

Caecum & portions of ileum & ascending colon; caecum & colon show large ulcers penetrating to muscular coat.

9861

Do.

From same case as Specs. 9858, 9859, 9860 & 9861.

Catalogued July 3, 1888.

Portion of skull including soft parts, showing the basal ganglia & surroundings; upper brain mass absent — dura mater congested. Probably hydrocephalic.

9862

Presented by Dr. J. W. Adams.

From female infant, apparently 8 months.

Catalogued July 3, 1888.

Heart and ascending aorta. From case of valvular disease & aneurism.

9863

Presented by Dr. Sachau Tyler.

John Welsh, white, aged 25.

Catalogued July 3, 1888.

Right testis & portion of tunica vaginalis, showing, showing alveolar sarcoma of testis 5 x 3 inches in size

9864

Presented by H. L. Raymond, Asst. Surg. U.S.A.

Case of S. M. Royce, a dairyman

Catalogued July 3, 1888.

Human male Embryo with membranes & placenta, about 4 months old.

9865

Presented by Asst. Surgeon
P. F. Harvey, U.S.A.

Catalogued July 3, 1888.

Human Embryo, about two weeks old.

9866

Presented by Doctor
W. M. Gray, Microscopist,
F. M. M.

Returned to donor
March 27, 1897.

Catalogued July 3, 1888.

Human Embryo & membranes about one month old, shows umbilical vesicle.

9867

Do.

Catalogued July 3, 1888.

Upper lobe of left lung, showing many tubercular nodules, etc.

9868

Presented by Dr. G.
Wythe Cook.

Catalogued July 5, 1888.

Uterus & appendages, portions rectum & ileo-colon, showing disease etc.

9869

Do.

Catalogued July 5, 1888.

New born pig (*Sus scrofa*);
double, showing union by
the heads & thoraces. It has
one nose, two mouths, two
forelimbs & four hind ones.
Cephalo-thoracopagus.

9870

Presented by Doctor
J. W. Downey.

Catalogued July 5, 1888.

Heart, showing incipient
aneurism of ascending aorta

9871

Presented Dr. P. J. Murphy.

Mrs. - - - Mulatto.

Catalogued July 5, 1888.

Two sternums & hearts,
showing shot wounds;
also two bullets. From
a case of homicide & suicide

9872

Presented by Asst. Surg.
Edward Everts, U.S.A.

Pvt. H. F. Moss, 10th Cav.
& Citizen Jane Dandridge,
both colored.

Catalogued July 5, 1888.

Larynx & trachea; Larynx
showing extensive ulceration,
trachea with cicatricial bands, etc.
Probably Syphilitic.

9873

Presented by Surgeon
C. C. Byrne, U.S.A.

John O'Neil, late Pvt.
K, 7th Cav.

Catalogued July 5, 1888.

Melano-carcinomatous tumor,
size of small orange - from
labium majus.

9874

Presented by Doctor
J. Tabor Johnson

Catalogued July 18, 1888.

<p>Right testicle, bisected, showing enlargement & conversion into a fibroid mass; a fistulous opening in skin.</p>	<p>9875</p>	<p>Presented by Surgeon C. C. Byrne, U.S.A.</p>
<p>Case of A. F. Vance, an inmate of Soldiers Home, D.C.</p>		<p>Catalogued July 18, 1888.</p>
<p>Uterus etc, from a case of Extra-uterine gestation.</p>	<p>9876</p>	<p>Presented by Doctor Lachlan Tyler.</p>
<p>Alice Taylor, colored, aged about 27 years - Died June 27, 1888.</p>		<p>Catalogued July 18, 1888.</p>
<p>Lower portion of skull, from first to fifth cervical vertebrae, showing dislocation caries (tubercular) & exostosis. Case of Wm Catlett, colored.</p>	<p>B 5 9877 ✓</p>	<p>Presented by Asst. Asst. Surg. D. S. Lamb, U.S.A.</p>
		<p>Catalogued July 18, 1888.</p>
<p>Ileo-colic portion of intestine & adjacent muscle & fascia, occupied by a fibroma. Case of John Fitzgerald, Recruit, aet. 25. Died Feb. 28, 1888.</p>	<p>9878</p>	<p>Presented by Surgeon J. V. D. Middleton, U.S.A.</p>
<p>Liver of a female mulatto infant, 12 days old - peritoneal surface shows several patches of pseudomembrane.</p>	<p>9879</p>	<p>Presented by Doctor P. J. Murphy.</p>
		<p>Catalogued July 18, 1888.</p>

<p>Portion of base of brain including 3d & 4th ventricles, corpora striata & thalami optici.</p>	9880	<p>Presented by Doctor G. S. Palmer.</p>
<p>From a case of softening of brain & embolism of cerebral artery. Daniel E. Sonce, white, aged 73.</p>		<p>Catalogued July 19, 1888.</p>
<p>Portion of left middle cerebral artery, showing aneurism size of pea.</p>	9881	<p>Presented by Doctor Mary B. Parsons.</p>
<p>Case of Mrs. Sophia Wilkie, white, aged 94 yrs. See Specs. 9882 & 9883.</p>		<p>Catalogued July 19, 1888.</p>
<p>Portion of splenic artery, showing aneurism size nearly of hazel nut; walls calcareous.</p>	9882	<p>Do.</p>
<p>From same as preceding spec.</p>		<p>Catalogued July 19, 1888.</p>
<p>Uterus & appendages. Uterus atrophied in width, thickness & cavity, but body 4 in long & cervix hypertrophied and flattened. Tubes & ovaries atrophied. Vagina thickened & indurated.</p>	9883	<p>Do.</p>
<p>From same as preceding spec.</p>		<p>Catalogued July 19, 1888.</p>
<p>Part of base of brain including great ganglia, cerebellum, pons & medulla, showing tumors.</p>	9884	<p>Presented by Surgeon C. C. Byrne, U.S. Army.</p>
<p>Case of Conrad Bender, late Pvt. E, 10th Inf. Died at Barnes Hospital, Soldiers Home, D.C., Apl. 28, 1888.</p>		<p>Catalogued July 19, 1888.</p>

Two groups of lymphatic glands; the upper, the lumbar, the lower, the ilio-inguinal; the glands converted into sarcomatous tumors.

Case of James E. D., white, aged 36, married. Died Feb. 7, 1888.

Presented by Dr. C. A. Norton.

9885

Catalogued July 25, 1888

Right testicle, showing tubercular deposits.

J. R. H., white, aged 60 years, American, sea man.

9886

Presented by ^{Passed} S. T. Armstrong, Asst. Surgeon U.S. M. H. S.

Catalogued July 25, 1888.

Aneurysm of the popliteal artery

9887

Presented by Dr. J. C. Cornell.

✓

Catalogued Aug. 20, 1888.

Parturient uterus, showing large rent in anterior wall, through which protruded the bulk of the body of a full term foetus into the abdomen of the mother; the head & shoulders remaining in the uterus.

Marietta H. - Colored, married, age 24. Said to have many miscarriages. Died June 23/88.

MC 5

9888

Presented by Dr. J. Q. Adams, D.O.

Catalogued July 25, 1888

Part of head of hydrocephalic foetus, male, at full term

9889

Do.

From same as preceding specimen 9888.

Catalogued July 25, 1888,

Hydrocephalic brain of a boy
of 9 years; measuring 2.5 inches
in vertical circumference & 8.5
inches in length of base.

Presented by Magruder, Manchester,
M.D.

9890

P. B. K., white boy - Congenital
Hydrocephalus

Catalogued Aug. 20, 1880.

Larynx, portion of trachea and
thyroid gland, showing four
incised wounds of thyroid and
cricoid cartilages, mainly on
left side, penetrating cavity of larynx

Ga 5

9891

Presented by Surgeon
B. F. Pope, U.S.A.

Pvt. Edwin H. B., C³ Cav. aged 35
Suicide.

Catalogued July 25, 1888.

Left thumb, showing compound
dislocation backwards of distal
phalanx, Oct. 16, 1887.

A 2 5

9892

Do.

Pvt. John M^cQ., A, 19th Inf.
aged 48.

Died Oct. 22, 1887

Catalogued July 25, 1888.

Bladder & portion of sigmoid flexure. K 644

Do.

Bladder atrophied; shows at base a large
ulcer which has perforated into sigmoid
flexure - Some general peritonitis.

9893

Pvt. Edward B, K 19th Inf.

Died, Oct. 29, 1887.

Catalogued July 25, 1888.

Skeleton of a Pig below 10th Be 6

Purchased

dorsal vertebra, showing marked
posterior projection of 1st lumbar, 9894
but there was no injury or
disease of bone - Right hip-joint
ankylosed. Hypertrophy. Exostosis.

Catalogued July 25, 1888.

<p>Transverse portion of arch of aorta & its primary branches - innominate artery. Aneurism. Rupture. Trachea. Atrophy. Perforation. Aorta. Atheroma.</p> <p>August A., aged 42 - Norwegian - seaman.</p> <p>Died July 14, 1888.</p>	<p>Db 42</p> <p>9895</p>	<p>Contributed by Passed Asst. Surg. S. T. Armstrong, U.S. M. H. S.</p> <p>Catalogued July 25, 1888.</p>
<p>Right radius, ulna & Carpal bones of male, showing abundant exostoses around carpal bones & adjacent portion of radius.</p>	<p>Bd 44</p> <p>9896</p>	<p>Presented by Dr. Zee, Augusta, Ga.</p> <p>Catalogued July 25, 1888.</p>
<p>Egg-shell of chicken, <i>Gallus bankivi</i>, showing intra-uterine fracture in spiral direction & subsequent union.</p>	<p>A 3</p> <p>9897</p>	<p>Presented by Doctor E. M. Scharffer, Washington, D.C.</p> <p>Catalogued July 25, 1888.</p>
<p>Heart, showing hypertrophy and dilatation. Fatty degeneration. Clot - Valvular disease.</p> <p>Daniel M. R. art c. 90. Veteran soldier of 1812 to 1814 Died July 20, 1888 at Soldiers Home, D.C.</p>	<p>Da 42</p> <p>9898</p>	<p>Presented by Surgeon C. C. Byrnes, U.S.A.</p> <p>Catalogued Aug. 20, 1888.</p>
<p>Imperfect sacrum and left innominate bone, showing the joint obliterated throughout except a thin interval at the back part. Synostosis, non traumatic. From Indian Mound at mouth of Illinois River.</p>	<p>Bd 3</p> <p>9899</p>	<p>Purchased from the Hon. Wm McAdams, Alton, Illinois.</p> <p>Catalogued July 28, 1888.</p>

Gall bladder full of faceted # i 46
gall stones size of peas.

9900

Presented by Doctor,
D. S. Lamb.

Mrs. B, mulatto, died at
Freedman's Hoapl, Washington,
D.C. Aug. 3, 1888.

Catalogued Aug. 20, 1888.

Left tibia and fibula, showing B e 6
oblique fracture of middle
of each bone; broken ends
united together in several
places by a wreath of new bone. ✓
Showing 3 inches. From a
young bear.

9901

Presented by Asst. Surg.
E. A. Mearns, U.S.A.

Catalogued Aug. 20, 1888.

Right scapula, showing com B d 5
pound comminuted fracture
of infra-spinous portion. 9902

Presented by Asst. Surg.
W. S. Jarvis, U.S.A.

George W. , German, ✓
discharged soldier, age 48,
officer's servant. Fall from carriage
July 2, 1888 - Died July 3, 1888.

Catalogued Aug. 20, 1888.

Intestines of a dog, showing
perfect union without adhesions,
one month after complete trans- 9903
verse section of the gut. The H e 7
line of suture appears as a
slight ridge. ✓

Presented by Doctor
Wm S. Halsted.

Catalogued Oct. 1, 1888.

Vault and part of base of B d 7
cranium of ancient Peruvian,
showing trephining. 9904
Inflammation - Exostosis. ✓

Purchased.

Catalogued Oct. 1, 1888.

Larynx and trachea from
a case of obstruction of
larynx by a membrane.

9905

H 45

R. male, age 45.

Presented by J. Solis Cohen,
M.D.

Catalogued Dec. 14, 1888.

Liver & gizzard of a pigeon, nearly
half of the liver is occupied by a
whitish cheesy mass, probably tuber-
cular; the gizzard shows also
on one surface a thick whitish
patch, firmer than that of the liver,
but probably of same character.

9906

H 45

From National ^{U.S.I.} Museum,
Washington, D.C.

Oct. 15, 1888.

Two Casts, one of upper, the other
of the lower jaw, of an adult.

Right side of upper jaw shows a small
wisdom tooth, & on its inner side
a second smaller one, with two cusps;

9907

H 23

In the lower jaw the 2d premolar is
absent on each side & the lateral incisor
on the left.

Presented by Dr. E. G. Betty,
Cincinnati, Ohio.

Catalogued Oct. 15, 1888.

Four portions of small intestine of
a dog, showing Dr. H's stitches
in resection of intestine & the result
No 9908, shows the resection stitches
applied, not yet tied.

9908

H 27

See 9909, 9910 & 9911.

Presented by Dr. Wm S. Halsted,
New York.

Cat. Oct. 15, 1888.

Resection stitches tied, appearing
as knots between the folds; one
is not tied; the quilt stitches are
also introduced but not tied.

9909

H 27

Do.

See spec nos 9908, 9910 &

9911.

Catalogued Oct. 15, 1888

Shows quilt stitches tied.

Presented by Dr. Wm S. Halsted,
New York.

9910

H 27

See Specs nos. 9908, 9909, 9911

Catalogued Oct. 15, 1888

Q

Shows plain quilt stitches under peritoneum, on their way out into peritoneal cavity; also on inner surface, our presection stitch soon to be cast into the lumen of the bowel. See Circular suture of the intestine - An experimental study, Am. Jour. Med. Sci., Oct. 1887. See Spec nos. 9908, 9909 & 9910.

9911

H 27

Catalogued Oct. 15, 1888.

Model of left side of thorax & part of abdomen & left upper extremity, showing ichthyosis of the skin.

9912

N 43

Purchased -
Prepared by J. Baretta,
Paris, France.

Catalogued Oct. 15, 1888.

Cast of face of woman, art 26, showing acne rosacea, involving the space between the eyebrows & all below the eyelids. There are a few minute pustules & many which are collapsed; the whole diseased surface has a rosy blush.

9913

N 44

Purchased
Prepared by J. Baretta,
Paris, France.

Catalogued Oct. 15, 1888.

Cast of inner side of left leg & foot of a woman, art 22, showing prurigo, produced by scratching. The disease is in all stages. The woman had jaundice.

9914

N 44

Purchased
Prepared by J. Baretta,
Paris, France.

Catalogued Oct. 15, 1888.

Cast of the left & part of the right side of front of thorax & left shoulder of a boy, showing trichophyton *9915*
circinatus, in patches from half \$45
an inch to two inches in diameter

Purchased
Prepared by J. Baretta,
Paris, France.

Catalogued Oct. 15, 1888.

Cast of front of right leg & foot of an infant, showing pigmented urticaria; the patches are reddish purple & slightly elevated. *9916*
\$44

Purchased
Prepared by J. Baretta,
Paris, France.

Catalogued Oct. 15, 1888.

Cast of front of left side of chest, shoulder & part of arm, probably of an adult, showing *9917*
urticaria, in the shape of a name, \$44
"Baretta", with a scroll beneath, made by friction.

Purchased
Prepared by J. Baretta,
Paris, France.

Catalogued Oct. 15, 1888.

Cast of front of right knee & adjoining portion of thigh & leg of a man age 37, showing *9918*
"pityriasis" rubra pilaris. \$44

Purchased
Prepared by J. Baretta,
Paris, France.

Catalogued Oct. 15, 1888.

Cast of face of man age 28, native of Boston, showing bovine leprosy; elephantiasis tuberosa. *9919*
\$42

Purchased.
Prepared by J. Baretta,
Paris, France.

Cast of outer side of right thigh
of adult, showing secondary
syphilis, in the form of an
encrusted pustular eruption in
different stages.

Purchased.
Prepared by J. Barretta,
9922 Paris, France.
N 45
N 45

Catalogued Oct. 15, 1888.

Stuffed head of a hydro-
cephalic calf. Mother died
in the unsuccessful effort of
giving birth to the calf. The
specimen was removed at the
autopsy.

Presented by Dr. Frank Madden,
Lieut. U.S.A. (Retired)
9923

Catalogued Oct. 25, 1888.

Lower half of right leg & stump of
foot; cuticle loosened like a cast
from almost entire surface of spec. 9924

Presented by C. Meredith Woodward,
M.D.

Case of Silas S. Austin, formerly
Pot. A. 104th U.S. Vols. shot fract. of
right femur, Gettysburg, Pa. July 1, 1863.
Amputated midway between knee & ankle.
Sept. 19, 1888. by P. H. donor. Recovered.
Amput. of toe. Oct. 1886. Portion of foot amput. Nov. 1887.
for gangrene.

Cat. Oct. 25, 1888.

Ileum. Ileo ileostomy. Anastomosis.
Portion of ileum showing result
of ileo-ileostomy seven days after
gauze band obstruction. Animal
killed on eighth day.

Experiment 3

9925

He 7
He 6

Presented by Dr. W. Smith,
Milwaukee, Wis.

Catalogued Oct. 24, 1888.

Do.

Portions of ileum & colon, showing
results of ileo-colostomy 120
hours after gauze band obstruction.
Animal killed 21st day. Experiment
4.

9926

He 7
He 6

Catalogued Oct. 24, 1888.

Do.

Lower ileum & beginning of colon,
showing operation of ileo-colostomy
& anastomosis by perforated
decalcified bone-plates.

9927

He 7

Catalogued Oct. 24, 1888.

Do.

Stomach, duodenum & portion
of jejunum, showing results of
gastro-enterostomy. Apposition of
decalcified bone plates. Fatal on
21st day from valvular obstruction
of intestine at point of operation. The
plates 9929 were vomited on 9th day Case III

Case of Mary K., white, aet. 19. Said to have been struck on back of head with blunt end of axe. Fatal.		Cat. Mch. 12, 1889.

Skull, showing shot fracture	9960	Presented by Dr. A. A. Kochling, U. S. Navy.
Case of Pvt. John H. L., U. S. Marine Corps, aged 42 yrs.	B a 5	
Suicide, Dec. 16, 1888. See spec. 9961.	✓	Cat. Mch. 12, 1889.
Three bullets (Springfield rifle); one is slightly de- formed, the second more so & with small piece of bone attached	9961 B a 5	Do.
See spec. 9960.	✓	Cat. Mch. 12, 1889.
Heart. <i>Filaria immitis</i> . From heart of dog 12 years old, which had a tumor of one testicle & tumors of lumbar glands	9962	Presented by Wm H. Brown, National Museum.
	✓	Cat. Mch. 12, 1889.
Urinary apparatus of a boy, showing disease	9963	Presented by Dr. Geo. W. Eckert
	✓	Cat. Mch. 12, 1889.
Uterus and appendages & bladder. Vagina shows under mucous mem- brane an oval cyst, size of hazel-nut.	9964 U d 43	Presented by Dr. D. S. Lamb.
Female negro infant, several weeks old.	✓	Cat. Mch. 12, 1889.

Lungs and heart of an adult cat. The pleural surfaces of the convexities of the lungs show whitish raised thickenings about one-sixteenth inch broad.	9965	Presented by Mr. Porter Tracy.
	✓	Cat. Mch. 12, 1889.
Gall Stone (Cast of)	9966	Presented by Dr. J. H. Musser, Phila
	✓	Cat. Mch. 7, 1889.
Dissection of the ankle and dorsum of foot, showing varicose veins & the anatomy of the superficial region.	9967	Prepared by Doctor J. L. Worthman, Anatomist, Wash. D. C.
	✓	Cat. Mch. 7, 1889.
Artery. Aneurism. Ligation.	9968	Presented by Asst. Surg. Edward Coates, U.S.A.
Case of Robert B. — Sergt. Co. H, 10th U.S. Cav. Died Dec. 15, 1888.	✓	Cat. Mch. 22, 1889.
Lower segment of uterus, showing hypertrophy — Amputated.	9969	Presented by C. B. Winslow, M.D.
	Hc 42	
	✓	Cat. Mch. 22, 1889

Calvarium, showing fracture by a fall	9970	Presented by S. S. Adams, M.D.
Case of Beverly F. O., art 29. Died Feb. 26, 1889. see 9971.	Ba 5	Cat. Mch. 22, 1889.
Lower half of brain, showing laceration - Hemorrhage.	9971 Fa 5	Do.
From same as preceding spec. 9970.		Cat. Mch. 22, 1889.
Uterus & appendages, showing disease.	9972 Mc 46	Presented by Act. Asst. Surgeon D. S. Lamb, U.S.A.
	✓	Cat. Mch. 22, 1889.
Base of tongue, larynx, portion of trachea etc. Soft tumor size of pea, in floor of left glotto-epiglottic pouch. Tracheotomy.	9973 4a 46	Presented by Frank Hyatt, M.D.
Case of Dr. Francis W. art 67. Died Feb. 20, 1889.	✓	Cat. Apl. 12, 1889.
Left lung, showing disease.	9974 4B 44	Presented by Dr. D. S. Lamb, Act. Asst. Surg. U.S.A.
Case of Louisa G., mulatto, aged 28 yrs. Died Feb. 18, 1889	✓	Cat. Mch. 22, 1889.

Larynx & Trachea, showing disease.	9975 4a45	Presented by Dr. H. A. Kochling, U.S.A.
	✓	Cat. April 12, 1889.
Base of tongue, larynx, portion of trachea etc., showing disease.	9976 4a45	Presented by Surgeon C. C. Byrne, U.S.A.
Base of Henry G. - late Musician, M. 4th Arty, art 36. Died Mch. 6, 1889.	✓	Cat. April 12, 1889.
Heart, weighing 7 oz, showing disease.	9977 Da42 ✓	Presented by R. G. Manss, M.D.
		Cat. April 12, 1889.
Lower end of ileum, caecum & appendix vermiformis, showing disease	9978 He44	Presented by Surgeon J. B. Girard, U.S.A.
	✓	Cat. April 12, 1889.
Portion of base of brain etc - , showing hemorrhage.	9979 Fa41	Presented by Dr. J. S. Lamb
Case of Sister J. Colored, art. 50. Died Mch. 1, 1889.	✓	Cat. April 12, 1889.

Left occipital portion of brain, showing recent oval, hemorrhagic cavity.	9980 Pa 41	Presented by Doctor D. S. Lamb.
From same as preceding spec. no. 9979.	✓	Cat. Apr. 12, 1889.
Stomach of a horse, showing disease.	9981	Presented by C. B. Robinson, Vet. Surg.
	✓	Cat. Apr. 12, 1889.
Bones of knee joint, showing results of resection. Bov. Exostoses.	9982 Be 7	Presented by Doctor J. Ford Thompson.
	✓	Cat. Apr. 12, 1889.
Uterus, showing fibroids, hypertrophy - Left ovary atrophied. The spec. is 20 inches long, 12' broad & 6' thick.	9983 Mc 46	Presented by Doctor Mary H. Parsons.
Case of Martha B., single, colored, aet. 51. Died Feb. 28, 1889.	✓	Cat. Apr. 12, 1889.
Right kidney weighing 7 lbs 10 oz., showing disease.	9984	Presented by C. B. Robinson, Vet. Surg.
From a Cow 8 years old comp.	✓	Cat. May 7, 1889.

Right testicle, showing tubercular deposits.

From a man aged 33.
Recovered.

9985

Presented by Act. Asst. Surg.
W. C. Farrow, U. S. A.

✓

Rectum & portion of descending colon of Baa constrictor, female, showing disease. Comp.

9986

Cat. May 7, 1889.
From U. S. National Museum.

✓

Portion of small intestine, showing hypertrophy and dilatation.

9987

Cat. May 7, 1889
Contributed by Doctor
G. R. L. Cole -

✓

Cat. May 8, 1889.

Cancerous mass involving peritoneum, convolutions of intestine from left lower part of abdomen, & superficial tissues from left brim of pelvis - Case of J. D. White aged 60 years. Died Apr. 25, 1889. See. 9989, 9990 & 9981.

9988

Presented by Dr. S. B. Busby,
Washington, D. C.

H K 46

✓

Cat. May 8, 1889.

Cat. May 8, 1889.

Portion of liver showing soft
nodules of cancer varying 9990
in size. H 646

From same as preceding
spec. 9988, 9989. ✓

Presented by Dr. S. B. Bury,
Washington, D.C.

Cat. May 8, 1889.

Left Kidney, weighing 2.5
oz. pelvis much dilated,
apparently from pressure on
ureter. 9991 Ka 42

Do.

From same as preceding
spec. 9990. ✓

Cat. May 8, 1889.

Heart weighing 7.5 oz.,
showing malignant endocarditis
& dilatation 9992 Da 45

Presented by Doctor
John Trumbull, Valparaiso,
Chili.

Case of G.B., aet. 28 years
Published in Medical Record,
N.Y., Jan. 26, 1889, p. 90. ✓

Cat. June 14, 1889.

Heart of a colored female
foetus, about term; death in
utero, showing congestion of
pericardium - Haemorrhage
see spec. 9994 Da 44

Presented by Act. Asst.
Surgeon D. B. Lamb, U.S.A.

Cat. June 14, 1889. ✓

Left lung, showing two large
haemorrhagic infarcts in
adjacent edges of upper &
lower lobes. 9994 G 641

Do.

From same as preceding
spec. 9993.

Cat. June 14, 1889.

Skull of a child about 5 years old, showing syphilitic (?) inflammation. **Ba 45** 9995 Purchased from Mr. George Rieper, Lima, Peru.

✓

Cat. June 4, 1889.

Colon, showing cancer, perforation & peritonitis 9996 **He 46**

Presented by Doctor J. Taber Johnson.

Case of a woman.

✓

Cat. June 4, 1889.

Portion of small intestine of a dog, showing several *doehmi* trigonocephalus attached to the intestine 9997 **He 45**

Presented by Doctor Cooper Curdick,

✓

Cat. June 4, 1889.

Portion of small intestine of sheep, showing disease. 9998 **He 45**
Parasite in small vial.

Co.

See spec. 9999.

✓

Cat. June 4, 1889.

Portion of large intestine showing similar condition as preceding spec. 9998. 9999 **He 45**
Caused by parasite.

Co.

✓

Cat. June 4, 1889.

Tongue, larynx & beginning of trachea, showing total atresia of trachea one-half inch below larynx.	10000 43 4a3	Presented by Doctor D. C. Patterson.
See 1001 for history	✓	
		Cat. June 4, 1889.
Heart & great vessels, showing anomalies.	10001	Do.
From a colored female foetus about 7 months old.	43 D63 Da3	
See Specs. 1000 & 1002.	✓	Cat. June 4, 1889.
Stomach & intestines, showing atresia of pylorus & of lower part of rectum.	10002 43 4d3 4f3	Do.
See 1000 & 1001.		
	✓	Cat. June 4, 1889.
External organs of generation, male, showing much dilatation of left tunica vaginalis testis from inflammation	10003 La44	Presented by Doctor P. J. Murphy.
Mulatto, male infant, age 10 days. Died Feb. 29, 1888.	✓	Cat. June 4, 1889.
Large flat pieces of cuticle desquamated from the feet.	10004 x45	Presented by Doctor D. W. Pruitie.
Base of Eddie H. —, aged 10 years, white. Scarlet fever.	✓	Cat. July 18, 1889.
Recovered.		

Bladder, showing cancer;
hypertrophy, inflammation
& ulceration.

Operator: Dr. James Kerr.

Case of J. H. B., aged 50 years,
late Capt. U.S. Vols.

10005
K 6 46

Presented by Act. Asst.
Surgeon H. B. Yarrow,
U.S.A.

Cat. July 18, 1889.

Ch.

Left Kidney, much contracted,
capsule adherent & indurated, pelvis
& ureter dilated. Left testicle nor-
mal but lying just under
the kidney, undescended.

10006
T 2 3

M 6 3

Presented by Act. Asst.
Surgeon D. S. Lamb,
U.S.A.

base of Georgianna Richardson.
Died June 23, 1889.

Cat. July 18, 1889.

Pyloric end of stomach & first
portion of duodenum, showing
disease.

10008

Presented by Doctor
R. T. Edes.

Cat. July 18, 1889.

Longitudinal vertical section
of cerebrum, showing softening
of optic radiation.

10009

Presented by Doctor
William O'Leary, Balto.,
Md.

Cat. Oct. 14, 1889.

Skeleton of a woman.

Fracture of femur -

The specimen shows softening;
fatty degeneration - joint
inflammation - ankylosis.

Patient suffered from rheumatism.

10010

Presented by Doctor
Mary Parsons.

Cat. Oct. 15, 1889.

Uterus, showing abscess.

Ovary - atrophy.

10011

Do.

Cat. Oct. 15, 1889.

Oval vesical calculus,
weight 2 oz & 170 grs.; surface
rough longitudinal section.

Nucleus composed of calcium
carbonate. Removed post
mortem from bladder of
an old horse. Comp.

10012

Presented by Doctor
Hunter McQuire.

Cat. Oct. 14, 1889.

Oval intrastrial calculus,
weighing 2 dr. 28 grs.;

composed of brown concentric
layers with black granular
nucleus. The latter consists of some

amorphous material in which is embedded
some unknown insect, the legs & portion
of body of which can be recognized.
Woman, age about 60. Removed by the
donor.

10013

Do.

Cat. Oct. 14, 1889.

Twin female foetuses at
about 7th month.

One well formed, the
other shows malformations

Mrs. H. - age about 20.
